Ai Model

2-in-1 Glass Oil Dispenser & Sprayer
Designed for precise, mess-free cooking.

Raw Client Assets

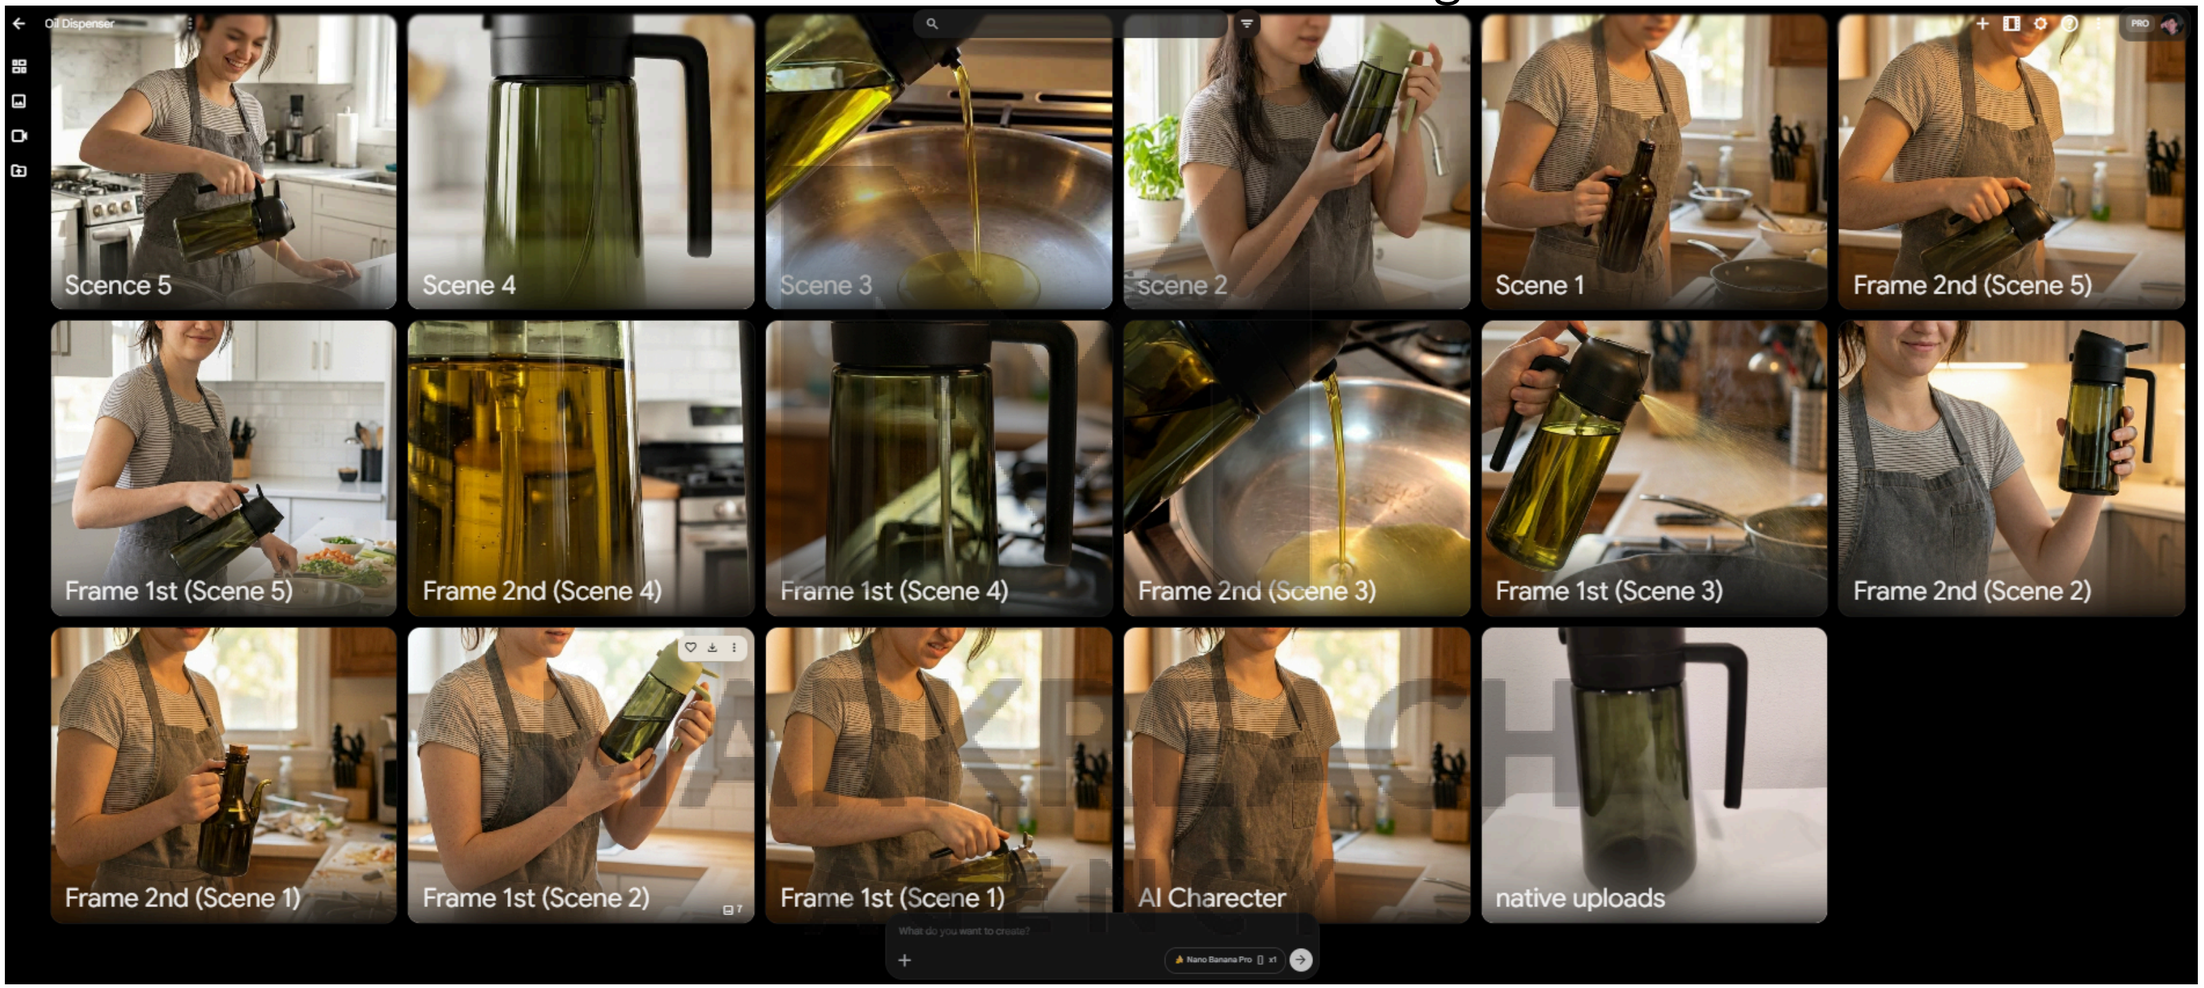
Result

A young woman in her mid-20s standing in a cozy, sunlit kitchen, wearing a slightly worn gray apron over a striped t-shirt. Her dark hair is tied back in a loose, messy ponytail. She looks directly at the camera with a calm, slightly serious expression. Warm natural sunlight streams through a window behind her, softly backlighting the scene. The kitchen has a homey, realistic feel with wooden cabinets, a gas stove in the foreground, and subtle clutter like a soap bottle near the sink. Cinematic lighting, shallow depth of field, soft shadows, warm tones, realistic skin texture, 35mm lens, documentary-style photography.

NanoBanana Prompt

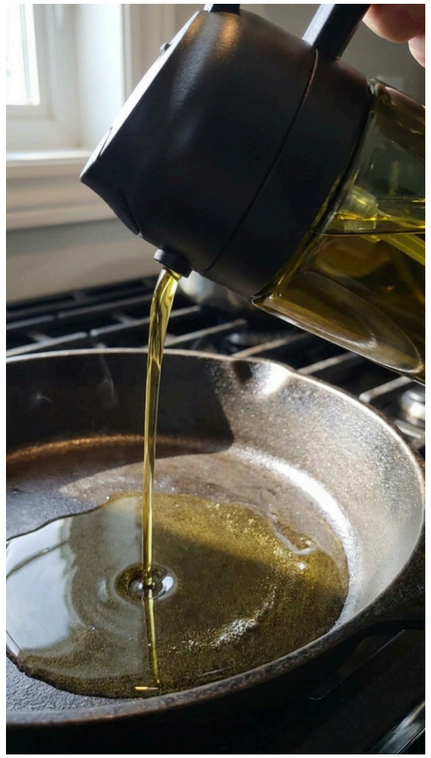
Storyboarding

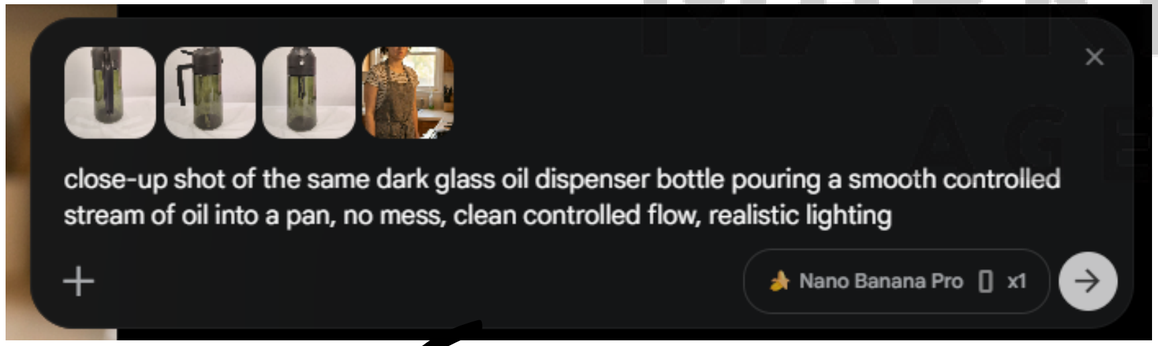
Structured Workflow & Asset Management

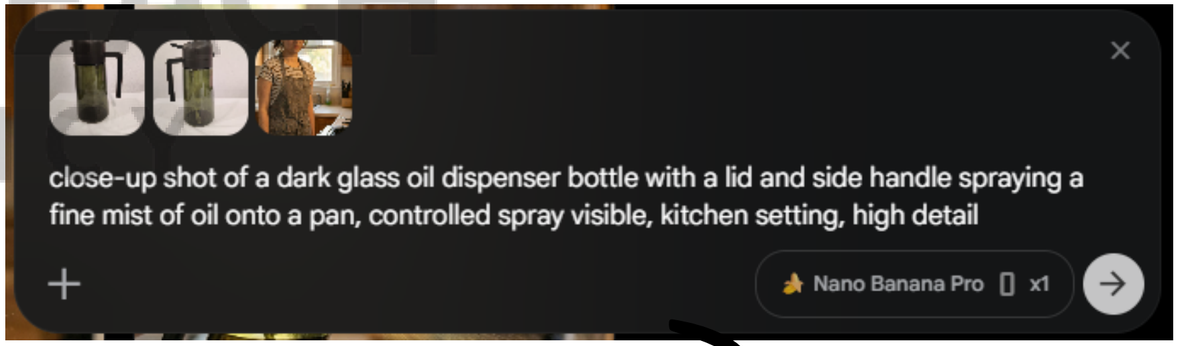


A highly organized workspace blending static reference frames with final AI-generated video scenes. Structuring every asset meticulously to ensure a seamless narrative and consistent visual flow before the final edit

Prompt Engineering for Dynamic Actions

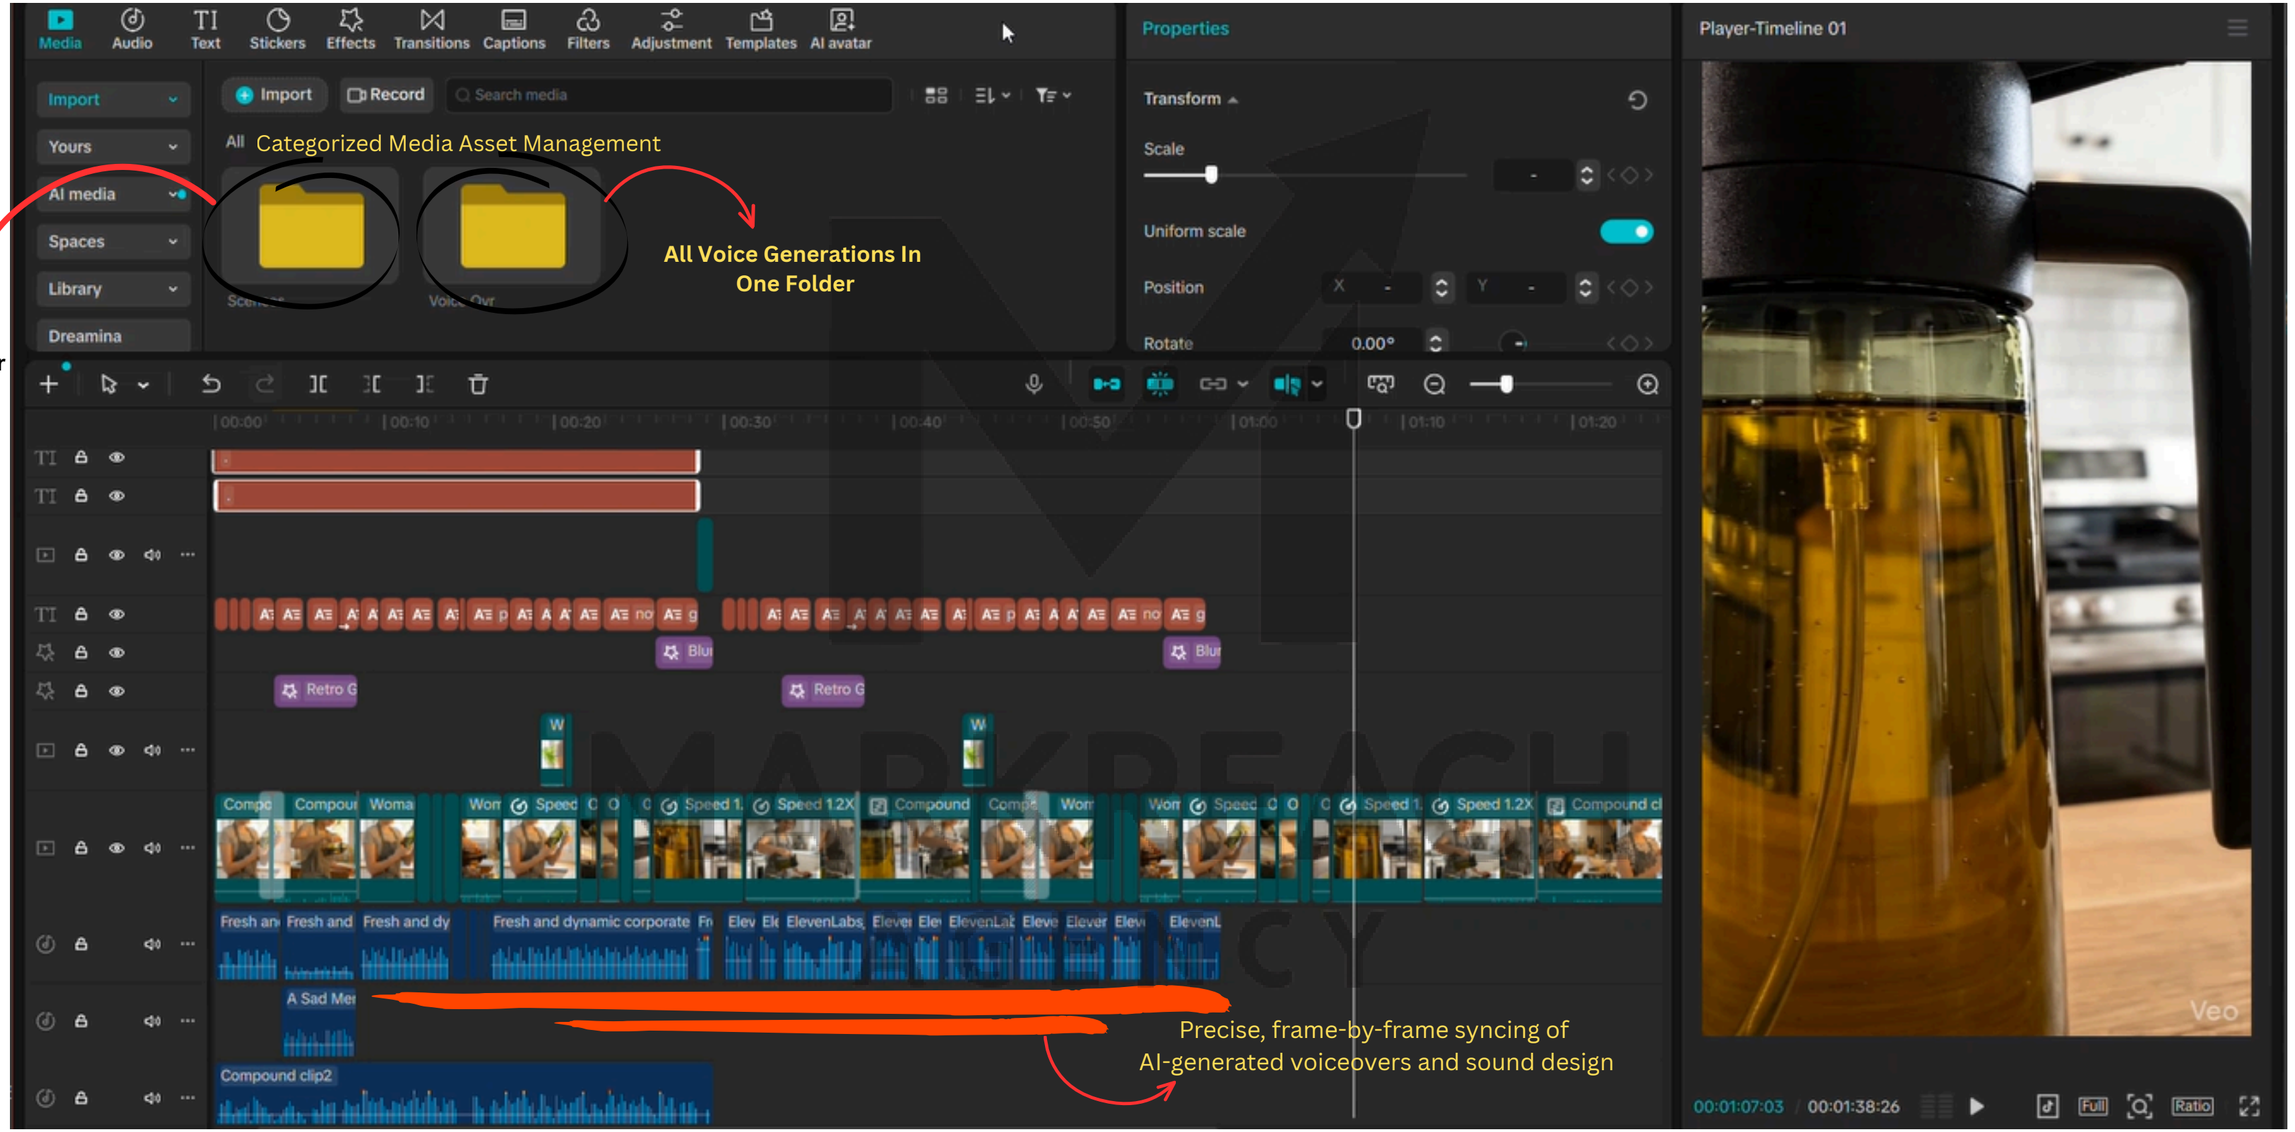






Crafting highly specific prompts to achieve realistic physics (like oil pouring and spraying). Perfecting the close-up B-roll shots to highlight the product's main features without losing realism

The Final Polish: Advanced Post-Production



The most crucial phase of the workflow. Meticulous editing is applied to refine video pacing, mask any AI generation artifacts, and ensure flawless visual continuity. Combined with dynamic text and precisely synced ElevenLabs audio, the raw AI clips are transformed into a high-retention, conversion-ready asset.
